Transporting viewers to a joyous kingdom full of sparkle matter, happy thoughts and the occasional rage-out, this all-new animated series follows Unikitty, the beloved character from The LEGO® Movie, and a whole cast of friends into a world full of adventure, excitement and dance parties.

As ruler of the kingdom, Unikitty has busy days full of royal responsibilities. Unikitty is most interested in making sure everyone is happy and ridding the kingdom of negativity, but don't misunderstand her optimism – she is one kitty not to be crossed. While she may be full of boundless energy and creativity, Unikitty is a force to be reckoned with if anyone gets in the way of spreading her positive vibes, especially if anyone makes her little brother and best friend, Puppycorn, sad.

Through it all, Unikitty and her friends make sure that every day is the happiest and most creative ever.

CLOUDY WITH A CHANCE OF MEATBALLS

BRAND NEW EPISODES

WEEKENDS, 9:35AM FROM APRIL 7

Cloudy with a Chance of Meatballs: The Series takes place before giant food rains down on Swallow Falls, when sardines are still the driving force behind the blue-collar town's booming economy. Flint Lockwood is a high school student who suffers from NFD: non-fish-related dreams. He strives to be a serious inventor in a world beyond sardines...and maybe one day have his inventions change the world instead of blowing up in his face.

Joining the cause is Sam Sparks—new girl in town and aspiring meteorologist. Flint and Sam come together for comedic adventures with all the great characters from the film: Flint's dad, Tim; Flint's lab assistant, Steve the monkey; Earl, the school's busiest teacher; Manny, the head of the school's audio-visual department; Brent, the local teenage celebrity and captain of the mascot team; and Mayor Shelbourne, who wins every election with a pro-sardine platform (and bribes...lots of bribes).
